

GENERAL NOTES:

1. Steel poles shall comply with requirements of "EEI-NEMA standards for Steel Lighting Poles" EEI Publ. TDJ-135.
2. Poles and brackets shall be galvanized steel.
3. Poles shall be furnished with handhole and cover.
4. Mast arm shall accommodate 2" slipfitter luminaire.
5. Poles shall have 1/2" N.C. nut welded inside pole opposite handhole for grounding terminal.
6. Pole shall be furnished with base cap, pole cap, arm and 4 anchor bolts and 8 nuts and washers.
7. Conduits for underground circuits shall be rigid PVC, Electrical Plastic Conduit (EPC), schedule 40, 1 1/2" min. or approved equal with a minimum cover of 18".
8. Junction boxes shall be State No. 3 1/2 with bolt down cover marked "STREET LIGHTING". Box's bottoms shall be grouted, including 1/2" weep holes.
9. A J.B. is required at each electrolier; when more than one bend is needed to reach electrolier, at any PG & E service point and where shown on improvement plans.
10. Street light conductors shall be copper, min. no. 8AWG, type THHN, or as shown on plans.
11. The location, size and type of luminaries shall be as shown on approved plans or as directed by the City Engineer.
12. The service point and voltage shall be as shown on plans or as designated by PG & E.
13. All 70 & 100 Watt electrolier services shall be 120 volts unless otherwise approved by the City Engineer.
14. All electroliers are to be installed complete in place, service connected and operable.
15. Pole shall be erected and plumbed prior to pouring concrete base cap.
16. Top of concrete cap to be flush with walk, except concrete cap shall be 3" above adjacent ground in unpaved areas.
17. Rigid conduit bends to be installed in concrete base of electroliers.
18. Rigid metal conduit run with a minimum cover of 24" required in pavement.

X= 7.5 with 4ft. contiguous sidewalk

X= 2.0 with separated walk and in commercial and in industrial areas

POLE SCHEDULE

Manufacturer	Type	Gauge	Cat. No.	Nominal Shaft Size	Approx. Mtg. Ht.	Bracket Length
PUMCO	Round	11	FBI30-BI-80	8"x3.8"x30'-0"	30'-6"	8'
AMERON	"	10	A308-2	"	"	"
VALMONT	"	11	DS-30-80 A300-8	"	"	"

BASE DETAILS

NOTES:

1. Fuse all hot leads in pole. Use single fuse holder with 10 amp for 120V & double with 10 amp fuses of 240V.
2. A no. 8 bare bond wire is to be connected from the grounding bushing of one conduit end to the grounding bushing of the other conduit end in each pull box if metal rigid conduit is used.
3. A no. 8 neutral bonding wire shall be connected to the grounding terminal.
